ABOUT US

The Natural Stone Awards is a biennial award set up to celebrate the best and brightest of natural stone construction projects from across the industry. Each year we see hundreds of projects from across the United Kingdom, entered across the different categories.

The Natural Stone Awards provides winners with widespread industry exposure as well as the kudos of winning one of the industry's most sought-after accolades.

Stone Federation exists to promote the use of natural stone as the versatile, durable and sustainable building material of choice and the awards provide the perfect platform to celebrate natural stone in all its various forms and applications.
